2 Overview

The LMS (Leak Management Software) is used to manage the leak information imported from the S531/S532 detector. It is a lightweight, GUI-based software running on the Windows platform.

Note: The LMS can only run on Windows 10 or Windows 11 system.

The LMS is free to use for 30 days. After that you have to purchase a license if you want to use it.

This quick start guideline helps you get start with the LMS, including detailed illustrations from installation and startup of the LMS.

3 Install LMS

Follow the steps below to install the LMS.

- 1. Download the LMS software from the SUTO website: <u>www.suto-itec.com</u> to your PC.
- 2. Double click the **LMSInstaller.exe** file on your PC, as shown below.
